CG AJ Bell Cautious

Investment objective

The Fund aims to make a positive return over 5 years by investing mainly in defensive assets such as cash and bonds, and less in higher risk assets such as company shares. This is to keep the Fund within the requirements of its pre-determined risk profile.

Investment approach

By spreading out the investments across regions, sectors and different types of assets, the fund aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products mainly hold typically lower risk assets such as cash and bonds, with smaller holdings in company shares. The fund also directly invests in some government bonds. The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the fund, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

The Ongoing charges figure (OCF) includes the underlying OCF, the annual management fee, and the costs for running and administering the fund structure. The annual management fee is variable, as it consists of the fixed OCF, minus all other costs.

Transaction costs represent the net costs incurred by the fund in buying and selling underlying investments. These are the gross costs offset with any pricing mechanisms used by the fund to protect investors from the cost of transactions (such as swing pricing). In some instances this may result in a negative number.

Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the Fund. The Fund does not aim to track the IA sector as a benchmark. Performance is calculated on a net of fees basis.

Totals may not sum to 100% due to rounding.

The Dynamic Planner Risk Target Managed (RTM) scheme has risk profile bands ranging from 3-8, with 8 being the highest. It is based upon proprietary research and analysis of the long-term forecast returns and volatility of the Dynamic Planner asset and risk model. The risk profile assessment is reviewed independently by Dynamic Planner on an ongoing quarterly basis. Dynamic Planner is the brand name of the software system powered by Distribution Technology (DT). Copyright © Distribution Technology Ltd 2018 onwards.

FinaMetrica risk tolerance scores were mapped to the funds' strategic asset allocations. The mappings are only for use by financial advisors licensed to use FinaMetrica Risk Profiling system, are for guidance purposes only and do not constitute financial or investment advice.

EValue Limited ("EValue") owns the Funds Risk Assessor solution, which can be used to measure the risk rating of an investment fund or portfolio of investment funds. The AJ Bell Growth Funds were assessed on the EValue standard 1-10 rating scale across a 10 year time horizon.

Defaqto is a financial information business. AJ Bell has received a Defaqto Risk Rating and has been 5 Diamond Rated for its CG AJ Bell Cautious Fund.

The Synaptic Risk Rating Service is derived from the risk framework provided by Moody's Analytic's Stochastic engine. The AJ Bell Funds have been assessed on the Synaptic Risk Stamp 1-10 rating scale.

The Oxford Risk forward-looking risk estimates and mapped risk bands for the AJ Bell Funds can be expressed using five or seven bands.

The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Currency Risk:	The Fund invests in overseas markets and the value of its investments and may rise or fall as a result of changes in exchange rates.
Emerging Markets Risk:	The Fund invests in less economically developed markets (i.e. emerging markets) which can involve greater risks and fluctuations in valuations compared to developed market places.
Index Trading Risk:	The performance of any passively managed funds may not exactly track that of their indices. This is referred to as 'Tracking error'.
Interest Rate Risk:	Fluctuations in interest rates may affect the value of the Fund and your investment.
Liquidity Risk:	The Fund invests within underlying funds and there is a risk that these suspend or defer the payment of redemption proceeds, which may impact the Fund's ability to meet redemption requests.

The Ongoing charges figure (OCF) includes the underlying OCF, the annual management fee, and the costs for running and administering the fund structure. The annual management fee is variable, as it consists of the fixed OCF, minus all other costs.

Transaction costs represent the net costs incurred by the fund in buying and selling underlying investments. These are the gross costs offset with any pricing mechanisms used by the fund to protect investors from the cost of transactions (such as swing pricing). In some instances this may result in a negative number.

Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the Fund. The Fund does not aim to track the IA sector as a benchmark. Performance is calculated on a net of fees basis.

Totals may not sum to 100% due to rounding.

The Dynamic Planner Risk Target Managed (RTM) scheme has risk profile bands ranging from 3-8, with 8 being the highest. It is based upon proprietary research and analysis of the long-term forecast returns and volatility of the Dynamic Planner asset and risk model. The risk profile assessment is reviewed independently by Dynamic Planner on an ongoing quarterly basis. Dynamic Planner is the brand name of the software system powered by Distribution Technology (DT). Copyright © Distribution Technology Ltd 2018 onwards.

FinaMetrica risk tolerance scores were mapped to the funds' strategic asset allocations. The mappings are only for use by financial advisors licensed to use FinaMetrica Risk Profiling system, are for guidance purposes only and do not constitute financial or investment advice.

EValue Limited ("EValue") owns the Funds Risk Assessor solution, which can be used to measure the risk rating of an investment fund or portfolio of investment funds. The AJ Bell Growth Funds were assessed on the EValue standard 1-10 rating scale across a 10 year time horizon.

Defaqto is a financial information business. AJ Bell has received a Defaqto Risk Rating and has been 5 Diamond Rated for its CG AJ Bell Moderately Adventurous Fund.

The Synaptic Risk Rating Service is derived from the risk framework provided by Moody's Analytic's Stochastic engine. The AJ Bell Funds have been assessed on the Synaptic Risk Stamp 1-10 rating scale.

The Oxford Risk forward-looking risk estimates and mapped risk bands for the AJ Bell Funds can be expressed using five or seven bands.

The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Currency Risk:	The Fund invests in overseas markets and the value of its investments and may rise or fall as a result of changes in exchange rates.
Emerging Markets Risk:	The Fund invests in less economically developed markets (i.e. emerging markets) which can involve greater risks and fluctuations in valuations compared to developed market places.
Index Trading Risk:	The performance of any passively managed funds may not exactly track that of their indices. This is referred to as 'Tracking error'.
Interest Rate Risk:	Fluctuations in interest rates may affect the value of the Fund and your investment.
Liquidity Risk:	The Fund invests within underlying funds and there is a risk that these suspend or defer the payment of redemption proceeds, which may impact the Fund's ability to meet redemption requests.

CG AJ Bell Adventurous

Investment objective

The fund aims to make a positive return over 5 years by investing with a preference towards riskier assets such as company shares, and a smaller holding in defensive assets such as cash and bonds. This is to keep the Fund within the requirements of its pre-determined risk profile.

Investment approach

By spreading out the investments across regions, sectors and different types of assets, the fund aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares. The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the fund, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

CG AJ Bell Income

Investment objective

The Fund aims to maintain capital value over a typical investment cycle (5 to 10 years) whilst targeting an annual income distribution of between 3% and 5% when measured over a period of at least 3 years. It seeks to achieve this by investing with a preference towards income-generating assets such as bonds and company shares.

Investment approach

By spreading out the investments across regions, sectors and different types of assets, the fund aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares. The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. To deliver income the fund invests in a wide range of strategies that may include both actively managed and passive strategies. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the fund, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

ISIN	(I Acc) GB00BH3W7446 (I Inc) GB00BH3W7552
Fund manager	AJ Bell Asset Management Ltd
Target income	3.00%-5.00%

Based on the current composition of the portfolio and the most recent dividend and income payments made by these holdings we can estimate the target income yield the portfolio will generate over a trailing 3-year period. It is important to note that historic income and dividend payments are not always a reliable indicator of future income payments, especially in periods of market stress.

The Synaptic Risk Rating Service is derived from the risk framework provided by Moody's Analytic's Stochastic engine. The AJ Bell Funds have been assessed on the Synaptic Risk Stamp 1-10 rating scale.

Defaqto is a financial information business. AJ Bell has received a Defaqto Risk Rating 5 for its CG AJ Bell Income Fund. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Currency Risk:	The Fund invests in overseas markets and the value of its investments and may rise or fall as a result of changes in exchange rates.
Emerging Markets Risk:	The Fund invests in less economically developed markets (i.e. emerging markets) which can involve greater risks and fluctuations in valuations compared to developed market places.
Index Trading Risk:	The performance of any passively managed funds may not exactly track that of their indices. This is referred to as 'Tracking error'.
Interest Rate Risk:	Fluctuations in interest rates may affect the value of the Fund and your investment.
Liquidity Risk:	The Fund invests within underlying funds and there is a risk that these suspend or defer the payment of redemption proceeds, which may impact the Fund's ability to meet redemption requests.

Share class: I

CG AJ Bell Income & Growth

Investment objective

The Fund aims to make a positive return in line with inflation (as measured by the consumer price index) whilst targeting an annual income distribution of between 3% and 5% when measured over a period of at least three years. It seeks to achieve this by investing with a preference towards riskier assets such as company shares, and a smaller holding in defensive assets such as bonds.

Investment approach

By spreading out the investments across regions, sectors and different types of assets, the fund aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares. The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. To deliver income the fund invests in a wide range of strategies that may include both actively managed and passive strategies. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the fund, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

Fund launch date	8 April 2019
Share class currency	GBP
Legal structure	UCITS
Valuation point	12:00 Midday
Dealing frequency	Daily
ISA/SIPP eligible	Yes
Initial charge	0.00%
Ongoing charges per annum	0.50%
Transaction costs	0.16%
Fund size	£153.86m
ISIN	(I Acc) GB00BH3W7883 (I Inc) GB00BH3W7990
Fund manager	AJ Bell Asset Management Ltd
Target income	3.00%-5.00%

Based on the current composition of the portfolio and the most recent dividend and income payments made by these holdings we can estimate the target income yield the portfolio will generate over a trailing 3-year period. It is important to note that historic income and dividend payments are not always a reliable indicator of future income payments, especially in periods of market stress.

Risk profile

For investors who favour capital growth and regular dividend payments through a higher allocation to equities. Investors should understand the risk reward relationship that entails over the short, medium, and long term. The fund predominantly invests in funds, and exchange traded funds (ETFs), using a defined strategic asset allocation process to deliver returns while meeting the targeted level of risk.

The Ongoing charges figure (OCF) includes the underlying OCF, the annual management fee, and the costs for running and administering the fund structure. The annual management fee is variable, as it consists of the fixed OCF, minus all other costs.

Transaction costs represent the net costs incurred by the fund in buying and selling underlying investments. These are the gross costs offset with any pricing mechanisms used by the fund to protect investors from the cost of transactions (such as swing pricing). In some instances this may result in a negative number.

Performance is calculated on a net of fees basis. This fund launched on 8 April 2019.

Totals may not sum to 100% due to rounding.

FinaMetrica risk tolerance scores were mapped to the funds' strategic asset allocations. The mappings are only for use by financial advisors licensed to use FinaMetrica Risk Profiling system, are for guidance purposes only and do not constitute financial or investment advice.

The Synaptic Risk Rating Service is derived from the risk framework provided by Moody's Analytic's Stochastic engine. The AJ Bell Funds have been assessed on the Synaptic Risk Stamp 1-10 rating scale.

CG AJ Bell Responsible Screened Growth

Investment objective

The Fund aims to make a positive return over 5 years by investing with a preference towards riskier assets such as company shares, and a smaller holding in defensive assets such as cash and bonds. The Fund will have a bias towards assets that are screened for consistency with a responsible strategy that will exhibit environmental, social and governance (ESG) characteristics.

Investment approach

By spreading out the investments across regions, sectors and different types of assets, the fund aims to achieve its return objective whilst minimising price variation where possible. It does so by investing in collective investments, such as funds and ETFs. These products mainly invest in company shares, with small holdings in bonds. Where possible we choose products that screen out companies generating substantial revenue from certain business involvements that may be deemed by some as controversial or immoral. These include but are not limited to gambling, certain fossil fuels and genetically modified organisms or companies that are deemed to be in breach of the UN Global Compact. In addition, we look for products that overweight companies with stronger environmental, social or governance practices compared to other companies in the same sector, as determined by ESG rating companies such as MSCI. The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the fund, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

The Ongoing charges figure (OCF) includes the underlying OCF, the annual management fee, and the costs for running and administering the fund structure. The annual management fee is variable, as it consists of the fixed OCF, minus all other costs.

Transaction costs represent the net costs incurred by the fund in buying and selling underlying investments. These are the gross costs offset with any pricing mechanisms used by the fund to protect investors from the cost of transactions (such as swing pricing). In some instances this may result in a negative number.

Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the Fund. The Fund does not aim to track the IA sector as a benchmark. Performance is calculated on a net of fees basis.

Totals may not sum to 100% due to rounding.

Defaqto is a financial information business. AJ Bell has received a Defaqto Risk Rating 8 for its CG AJ Bell Responsible Screened Growth Fund.

Where practical the Responsible Screened Growth fund invests in products tracking MSCI Socially Responsible Investing (SRI) indexes for equity exposure. These indexes exclude companies with certain controversial business involvements and also utilise MSCI's Environmental Social Governance (ESG) ratings and ESG Controversy assessments. For further details please see MSCI's latest SRI Indexes Methodology document.
