Market commentary:

The noise in markets reached a crescendo at the start of the second quarter as President Trump’s ‘Liberation day’ revealed tariffs that shocked investors. Further scrutiny was poured on the US economy and the US dollar, as many began to reconsider their holdings of US assets. Geopolitical uncertainty in the Middle East had a surprisingly limited impact on markets, even as tensions between Israel and Iran flared into outright conflict before coming to a US-imposed ceasefire.

Fixed income

Tentative signs of inflation stability brought anticipation that the Federal Reserve could respond to any future economic weakness. Although Chair Powell has been resolute in the need to respond slowly, speculation about his successor and Trump’s hand in that selection started to influence market thinking, as did uncertainty over how the tariff situation would impact prices.

In the UK, the mechanical uplift to utility and water bills in April sent inflation back above 3%, a level it is expected to reside at for the rest of the year. As in the US, the Bank of England has been cautious while inflation remains above target. Shorter dated gilt yields rallied, steepening the yield curve, whilst longer dated yields remained volatile.

After a wobble during the equity market downturn in April, credit spreads narrowed again to leave corporate bonds with solid returns over the quarter.

Equities

Performance within equity markets continued to buck the trend of the last couple of years, with the US no longer the standout performer: other markets have taken the lead. Emerging markets such as Korea and Taiwan have been performing strongly, driven by major constituents Samsung and TSMC. Within developed Asia Pacific, Australia and Hong Kong performed well, the former driven by the financial sector.

Europe and the UK appeared to benefit from investors looking outside America for returns. The fiscal spending on defence and infrastructure prompted investors to look more closely at domestically focused segments of the markets. In the UK, a sustained rally in financials and defence stocks aided gains, whilst mid- and small caps performed well amidst takeover interest.

Chinese equities gave back some of the bumper gains seen in the first quarter, in keeping with their volatile nature and trade tensions with the US. Japanese equities continue to grapple with the implications of higher inflation, rising interest rates and what that means for the currency.

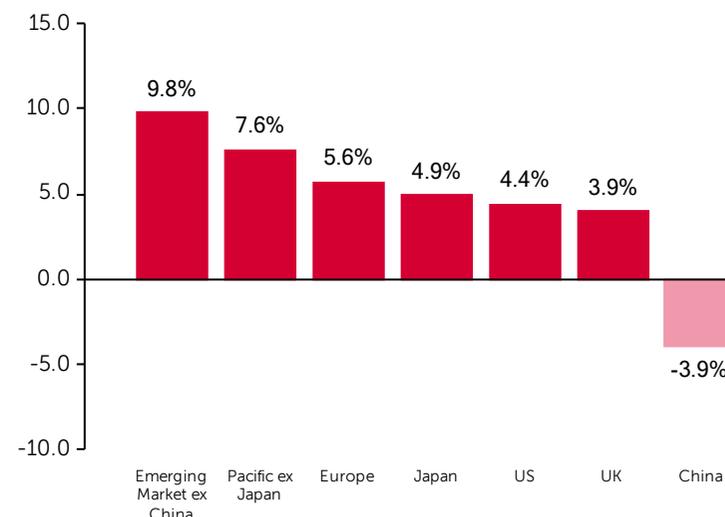

Outlook

Having seen one metaphorical and one physical ceasefire during the quarter, markets are entering summer in better spirits. Plenty of issues remain outstanding from the first half of 2025, not least that the tariff pause is due to expire in August. Having walked back from the brink once, there is a perception that Trump will be unwilling to test investor patience again, especially given the US dollar has remained on its weaker footing, supporting those claiming a strong dollar has been hindering US manufacturing.

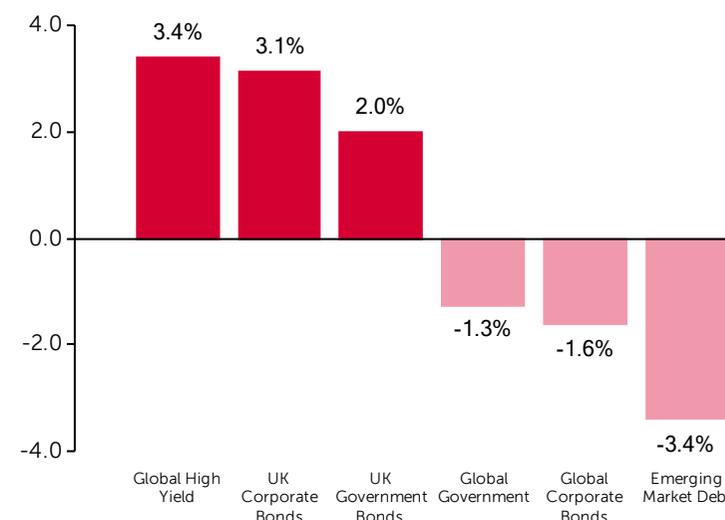

Nonetheless, it is difficult to see the relationship between Trump and the markets being plain sailing for the next four years. However, investors should pause to reflect if there has ever been a time when the outlook suggested calm waters.

The assessment of short-term events is interpreted by markets, at its most basic level, by what it means for growth and inflation. Sitting here today, the consensus appears to be that both will be acceptable, and markets will find a way to muddle through, as they often do.

Portfolio commentary

AJ Bell Active MPS 4 delivered a solid performance over the quarter, supported by broad-based strength across both fixed income and equity markets.

In fixed income, global high yield continued to perform well, driven by tightening credit spreads. Contributions from emerging market government bonds were partially shielded from currency headwinds through the M&G Emerging Markets Bond Fund's allocation to local currency debt, which helped to offset some of the impact of a weaker US dollar.

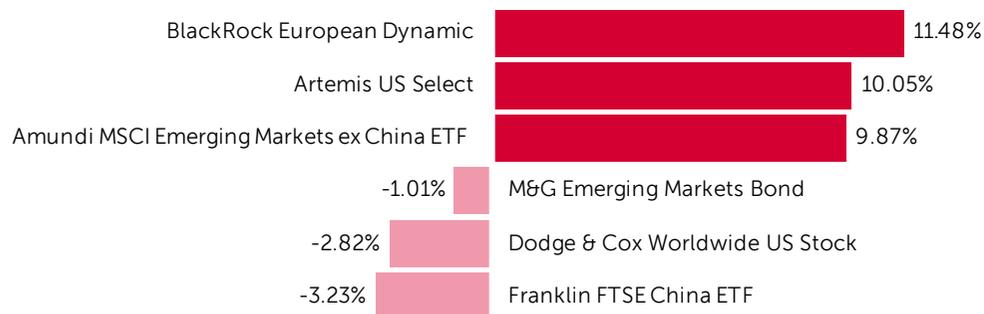

UK equities made a positive contribution in Q2, as global investors sought opportunities beyond the US. The Man Income Fund outperformed its benchmark, supported by its overweight to the financial services sector.

European equities also had a strong quarter, with the BlackRock European Dynamic Fund emerging as the portfolio's top performer. Its overweight to industrials proved advantageous, as increased defence spending across the region supported sector performance.

Looking further afield, emerging market and broader Asian equities led global equity returns. Tech giants in Taiwan and Korea such as TSMC and Samsung were notable strong performers.

Overall, AJ Bell Active MPS 4 returned 4.92% over the quarter.

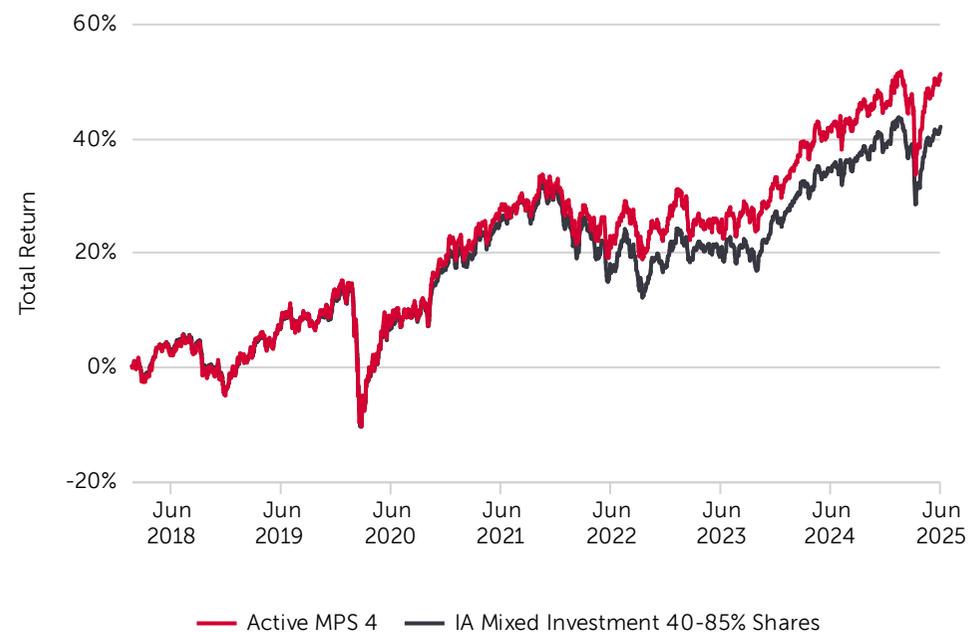

Q2 2025 best/worst performers

Performance

Cumulative (%)	3 months	6 months	1 year	3 years	5 years	Since inception
Active MPS 4	4.92	3.81	6.64	25.21	39.97	51.37
IA Mixed Investment 40-85% Shares	3.88	2.61	5.48	21.83	32.77	42.15
