Active Income MPS Quarterly Reports

As at 31 December 2025

Market commentary:

The fourth quarter concluded a broadly positive year for markets, particularly for riskier asset classes such as equities. In contrast to the summer, the prevailing AI narrative shifted somewhat; however, just as sentiment appeared to wane, corporate earnings provided renewed optimism.

Markets, for the most part, endured the second-longest US Government shutdown on record. The resulting patchy economic data from the US made it somewhat difficult to ascertain underlying trends. Nevertheless, the Federal Reserve saw enough in the employment data to lower rates decisively, delivering two further cuts before year end.

After inflation in the UK hovered at nearly double the 2% target during the summer months, it subsided to 3.2% by November. This enabled the Bank of England to implement a final rate cut in December, which supported gilts across the curve, as did the smooth passage of the UK Budget. A similar trend in inflation was observed in the US, following a gap in coverage due to the Government shutdown. US inflation eased to 2.7% in November, allowing the Fed to focus on the employment aspect of its mandate.

Corporate bonds enjoyed another positive quarter, ending 2025 on a strong note. Credit spread compression and higher starting yields helped them outperform government bonds this year. Consequently, those segments of the bond market carrying greater risk, such as high yield bonds, proved to be more attractive allocations in 2025.

Despite headlines highlighting US markets reaching all-time highs, returns in sterling terms were comparatively muted over 2025 due to the weakness of the US dollar. In the fourth quarter, US market returns were supported by Alphabet's rise to challenge Nvidia in AI chip design, while the latter remained steady. The healthcare sector performed well after leading companies reached drug pricing agreements with the US Government. UK and European equities were also buoyed by financials, with healthcare stocks performing strongly. The UK market additionally benefited from the

materials sector, which rallied on the back of rising precious and industrial metal prices.

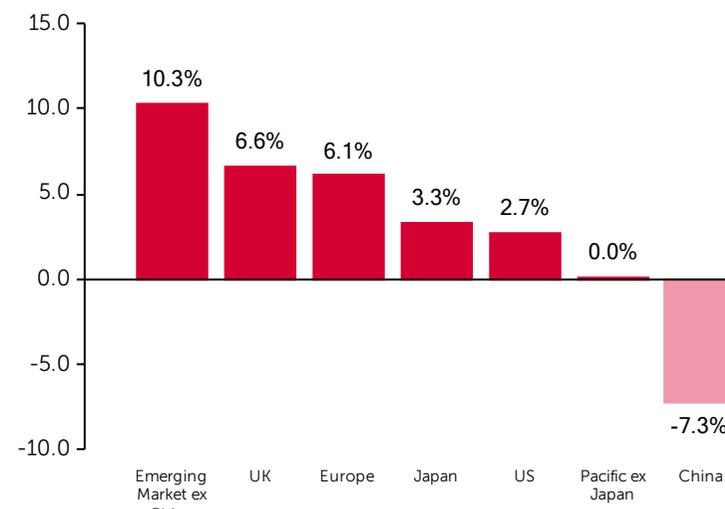

Emerging markets ex China continued their rally in the final quarter of 2025 as the AI theme and its supply chain attracted attention. Technology-heavy markets such as South Korea and Taiwan benefited, while Chinese equity markets and their AI leaders declined, reflecting their underlying reliance on consumer spending amid weaker economic data.

Looking ahead, AI is likely to remain a key theme, particularly for markets heavily exposed to the technological development and supply chains. As 2025 demonstrated, other themes across markets may attract less attention but remain significant.

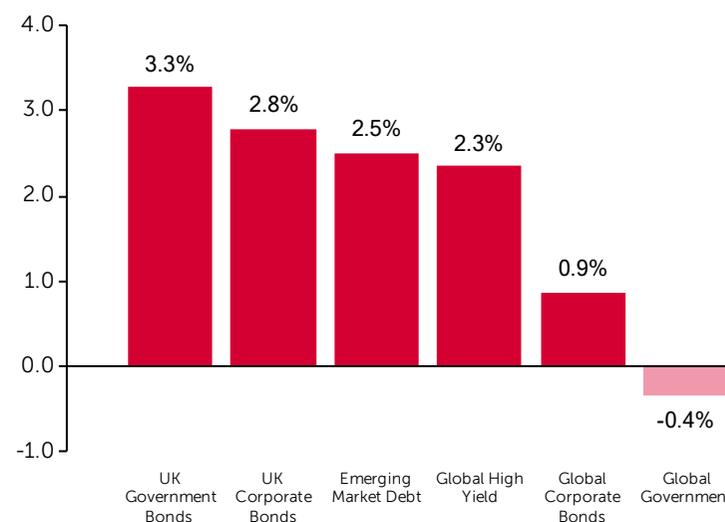

The rise in industrial metal prices towards the end of 2025 prompts questions about our position in the global economic cycle and the fragility of supply chains. This, in turn, brings inflationary dynamics back into focus. Despite some short-term relief, we believe there are considerable risks to maintaining inflation in line with central bank targets over the long term.

As ever there is a wide range of possibilities ahead of us, and therefore it is useful to return to one of our core investment principles: diversification. We see a continued need for a strong emphasis on diversification within bond and equity allocations in 2026.

Equity performance - last quarter

Fixed income performance - last quarter

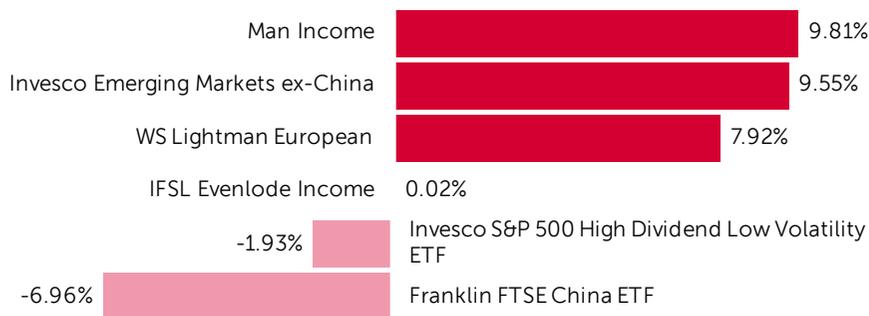

Portfolio commentary

Markets ended 2025 on a positive note. UK corporate bonds also performed well, benefiting from compressed credit spreads and the attraction of higher starting yields. Further down the credit spectrum, the M&G Emerging Market Bond Fund delivered strong returns, supported by its blend of local currency and US dollar denominated exposure. Global high yield bonds extended their gains into the final quarter, albeit with less momentum than in previous periods.

Within the equity side, the Man income Fund benefited from strength in Commodities, reflecting its overweight exposure to companies like Rio Tinto. Emerging Markets told a more mixed story. After making strong progress earlier in 2025, China retreated in the final quarter, while Emerging Markets ex-China continued their positive momentum, emerging as one of the strongest performing allocations in Q4. Performance in this region was led by South Korea and Taiwan, supported by technology supply chain strength.

Rising industrial metals prices towards year end kept inflation dynamics in focus as we turned to 2026. Overall, Active Income MPS 1 rose by 2.98% over the quarter and delivered a return of 10.88% for the full year 2025.

Q4 2025 best/worst performers

Performance

Cumulative (%)	3 months	6 months	1 year	3 years	5 years	Since inception
Active Income MPS 1	2.98	8.48	10.88	26.67	34.35	54.40

Portfolio commentary

The macro backdrop in Q4 was risk-positive, with AI-related leadership and the Healthcare sector supporting global equities. UK and European markets ended a strong year for investors, underpinned by strength in Financials and Materials. The Man Income Fund within the UK benefited from strength in Commodities, reflecting its overweight exposure to companies like Rio Tinto. Within European equity, the WS Lightman European allocation capitalising on the strong performance of its largest holding, Roche. Japan experienced political uncertainty in November, though equity prices subsequently recovered.

Emerging Markets ex-China was the strongest performing portfolio holding during Q4, benefitting from strength in technology supply chains in South Korea and Taiwan. Japan, another technology-heavy market, experienced political uncertainty in November, though equity prices subsequently recovered. After making strong progress earlier in 2025, Chinese equities however retreated in the final quarter making them the worst performer over Q4.

Rising industrial metals prices towards year end kept inflation dynamics in focus as we turned to 2026. Overall, Active Income MPS 2 rose by 3.91% over the quarter and delivered a return of 14.77% for the full year 2025.
