

MPS 5

As of 31 December 2017

Investment objective

The portfolio aims to grow assets in excess of inflation over the long-term, predominantly investing in global equity and emerging market assets and lower holdings in defensive assets.

Investment approach

The portfolio looks to deliver the maximum return possible for a level of risk that investors are comfortable with.

To do this, the portfolio invests collective investments such as funds and ETFs to deliver a highly diversified portfolio of assets including equities, bonds, commercial property and cash to deliver long term returns with a more predictable investment journey by smoothing out the worst of market volatility.

The AJ Bell investment team work closely with highly regarded economists from Moody's Analytics to deliver a long term approach that combines different assets to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in low-cost passive strategies that are designed to track the performance of indices such as the S&P 500 Index, the FTSE All-Share Index and the Barclays Sterling Corporate Bond Index to give exposure to a variety of asset classes across a diversified range of global markets. In addition, our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal additional impact on portfolio.

Top 10 holdings

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time.

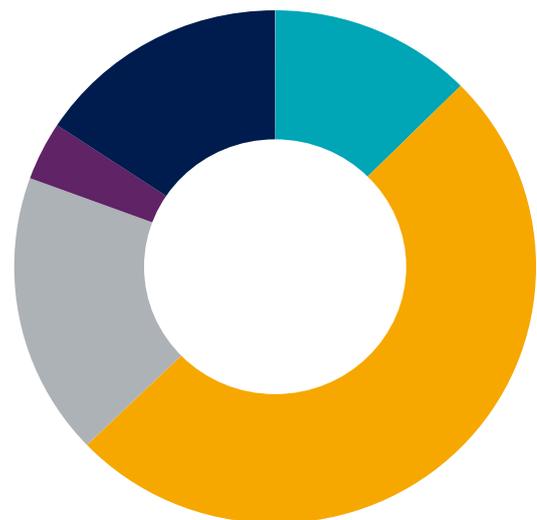

Risk profile

For investors who understand the risk and reward relationship of pure equity portfolios over the short, medium and long term.

The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

Asset allocation

17.81%	Fixed income	12.56%	UK equity
15.70%	Alternatives	50.24%	Overseas equity
3.69%	Cash (and equivalent)		

Performance

Cumulative Performance (%)						
	1 Month	3 Months	6 Months	1 Year	3 Years	5 Years
MPS 5	1.91%	3.97%	4.99%	9.53%		

Discrete Period Performance (%)	
	31/12/2016 - 31/12/2017
MPS 5	9.53%

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings.

Market volatility

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each fund vary from its average over time. This is measured over rolling 36 month periods and is used to help you understand the level of risk taken in each portfolio.

Expected volatility	12.6 – 14.7%
---------------------	--------------

Fees and charges

Annual investment management charge	0.25% plus VAT
Portfolio OCFs	0.20%

Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. For example, it costs £13.00 to buy the investments that make up MPS portfolio 5. Any charges payable to your financial adviser will apply in addition.

For further details of all applicable costs, please speak to your financial adviser or visit www.investcentre.co.uk.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.
